# British Transportation Museum Concept

Protecting Our  
Irreplaceable Legacies.

## Realizing the Vision:

*The goal of this endeavor is to establish a self-sustaining organization in the form of a British Museum of Transportation with continuing growth from year to year through increased interest and participation by its members, guests and visitors. The startup strategy is to have thirty British vehicles on static display with appropriate business and physical structure to display these vehicles. This would be backed up with a reserve of display vehicles which could be rotated into the display area on a scheduled basis. The facility would have provision for display of British automotive art, a library of books, manuals and periodicals, meeting rooms for use by local British automotive clubs and organizations, rooms for educational presentations and seminars, and a gift/memorabilia shop. Subsequent goals will be continuing growth and refinement of the museum through increased memberships and working with other automotive museums in the US and England to provide steady draw of new and repeat visitors.*

The Emerging  
Opportunity:  
“A Destination  
Corridor  
in Dayton”

- I-75 At Main Street
- I-75 at Edwin Moses
- OH-35
- 105,000+ Vehicles Daily

## “A Destination Corridor”

## I-75... “Flyer Way”
